ABSTRACT

Title: **Monitoring on Inclusion**

Abstract text (limited to 300 words, should include background, methods, results and conclusions):

CBM is an international Christian development organisation, committed to improving the quality of life of people with disabilities in the poorest communities of the world.

In early 2013, CBM took the strategic decision to design and pilot the Monitoring on Inclusion system with its partners.

The Monitoring on Inclusion (MOI) has been developed to respond to the need to better understand CBM and its partners' progress towards CBM's vision and its mission fulfilment of improving the quality of life of persons with disabilities and achieving an inclusive society for all.

Monitoring on Inclusion is defined as a system to measure and analyse the changes fostered by CBM and its partners towards Disability Inclusive Development in the spheres of

- The individual with disabilities
- The family of a person with disabilities
- The community/societal level in which they live
- The National Government and
- The partner organisation

The system shifts thinking from output to outcome, providing indications on how CBM's partners achieve progress towards the vision, measured with a number of inclusion indicators.

The system is oriented towards CBM partners as a monitoring tool that should be embedded, in the long-term, in CBM and its partner's programmatic monitoring systems; it is neither an assessment or evaluation tool nor a study or research instrument. It is rather a tool for understanding the implications of interventions to change at different levels.

The Monitoring on Inclusion piloting was set-up in 2 phases to inform CBM and the selected partners on the Monitoring on Inclusion concept, utilisation and learning.

Results of the pilot phase:

- 1.) Monitoring on Inclusion is understood and owned by selected partners
- 2.) Data were collected by interviewing key target groups and stakeholders
- 3.) Data were documented and analysed by partners
- 4.) Key findings and learning were triggered through a reflection process
- 5.) Partners use the findings to develop their new projects, to set 'inclusive' objectives and to develop 'inclusive' indicators.

Next Steps:

Refinement of the tool, simplifying data collection and analysis methods.

Deadline for abstract submission: November 30, 2015

Please submit your abstract to: disabilitycentre@lshtm.ac.uk

Restricted to one first author abstract per participant.

If you have any questions, please write to:
